

OPTIMIZER® The Ultimate Rink Divider.

Radiused ends

Easy assembly

Storage cart included

The Optimizer® is an aluminum framed rink divider designed for ultimate ease of installation and long wearing performance; the premier solution for arena managers, hockey coaches and associations looking to 'divide the ice' in order to facilitate half-ice practices as recommended by various federations, including USA Hockey's American Development Model (ADM) and Hockey Canada's Cross Ice Initiation Program.

The Optimizer® is available in standard 85' and 100' lengths and is shipped on it's own storage cart. Designed for ease of assembly and tear down, Optimizer includes a 28" gate opening panel and standard radiused ends. Each panel measures 90" long by 36" high and is made from aluminum welded frames. Facing is white UV stabilized HDPE with a red or blue top cap. Options include a 42" high version, yellow kickplate, and netting for upper puck containment. Customized panel lengths can be ordered to fit other rink widths.
